DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

- 1. Claims 18-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Akhtar et al. (US 7079499), hereinafter referred to as Akhtar.
- Claim 18, 25, 32 Akhtar discloses receiving a request at the first wireless network to access the second wireless network (Col 30 lines 51-61 and Col 33 lines 4-22, the first wireless network substantially heterogeneous with the second wireless network (Col 30 lines 38-50), and the request being on behalf of the mobile device and indicating a network system specifying the second wireless network (Col 31 lines 44-Col 32 line 11).

Akhtar discloses through the intermediary network (fig 1, 108, IP network) via the first wireless network, obtaining an access identifier for the second wireless network, the

Art Unit: 2616

access identifier for use by the mobile device when accessing the second wireless network (see fig 5 and Col 13 lines 53-Col 14 line 10).

Akhtar discloses providing to the mobile device via the first wireless network, the access identifier for the mobile device to use when accessing the second wireless network (fig 14A, element 1432, and Col 38 lines 45-Col 39 line 39 and Col 39 lines 54-67, NAI extension).

Claim 19, 26 Akhtar discloses the first wireless network being a wireless local area network, the second wireless network being a cellular telecommunications network (Col 1 lines 35-52 and Col 8 lines 36-40), and the mobile device being a personal digital assistant (Col 7 lines 42-Col 8 line 12).

Claim 20, 27 Akhtar discloses the request including a user identification of a user of the mobile device (Col 33 lines 5-14), and the step of receiving the request including determining an identity of the network system as a function of the user identification (col 33 lines 22-26, authentication verifies an identity).

Claim 21, 28 Akhtar discloses the step of obtaining the access identifier including providing an authentication request (Col 26 lines 39-Col 27 line 13) on the request to a dynamic host configuration server (Col 13 line 20-Col 15 line22).

Claim 22, 29, 33, 34 Akhtar discloses the access identifier being an Internet protocol address (Col 7 line 53-Col 8 line 12) and the intermediary network being the Internet (fig 1, 108).

Claim 23, 30 Akhtar discloses the step of obtaining the access identifier including requesting the access identifier from a network gateway (see gateways in fig 4B) for the

Art Unit: 2616

second wireless network, the network gateway providing the access identifier from a predefined range of access identitifers (Col 3 lines 53-Col 14 line 14, requesting IP address from a database containing a number of entries).

<u>Claim 24, 31</u> Akhtar discloses the step of providing the access identifier including storing the access identifier in a device database that includes device identification for the mobile device (Col 14 lines 1-6).

Response to Arguments

- 2. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., heterogeneous networks and obtaining an access identifier through the intermediary network and yie the first wireless network) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See In re Van Geuns, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).
- 3. In response to applicant's arguments, the concept of the first and second network being heterogeneous has not been given patentable weight because the recitation occurs in the previously rejected preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand

Art Unit: 2616

alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

Conclusion

4. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher P. Grey whose telephone number is (571)272-3160. The examiner can normally be reached on 7:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chau Nguyen can be reached on (571)272-3126. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
